Rich-Text

stages™ provides the ability to add Rich Text features on select fields used for dispatch instructions and information.

Fields that support Rich Text feature a Rich Text Edit button (right). The field opens in a modal edit window. Highlight an area of text to mark it as bold, italics or change the text-color by pressing the buttons below the field. The edits made in the Rich Text window are entered into the field upon close. The new field value can then be saved.

The size of the Rich Text edit fields is set the same as the display fields. The text will look the same in the displays as it does in the edits.

The fields are stored in both rich text and plain text in the database, enabling searches.

Fields that support rich text:

- Site Info
- Site Notes
- Contact Info
- Site Group Info
- Agency Instructions
- Action Plan Notes
- Action Plan Dispatch Instructions
