C - Code Word

Select action type as Code Word (C).

During a Code Word step, the Dispatch Wizard will execute the Verify Contact method defined in the [stages™ Options](#) window. (Utilities > stages™ > stages™ Options).

No additional setup is needed for C Type Steps.

Following Steps:

Steps following a code word step use the Action Outcome field to link back to the code word step.

When the code word is verified, the step with the corresponding outcome code will be triggered. Multiple outcome codes can be entered separated by a comma.

In addition to the below codes, an 'AllElse' code can be used. For instance, one following step can have an outcome code of 'VCWORD,VPIN' and another step of 'AllElse'. A NOCWPIN will trigger the step with the outcome code 'AllElse'.

Possible Outcome Codes:

- VCWORD (Valid Code Word)
- VPIN (Valid PIN)
- FCWORD (Form of Code Word)
- NOCWPIN (No Code Word/PIN)
- IVCWPIN (Invalid Code Word/PIN)
