Open and Close Event Status Definitions

The schedule controls what events are created and when schedule exceptions occur. THe following fields on the schedule screen control what events are generated on unusual schedule activities.

NOTE: If the field is blank, nothing will happen when the schedule exception occurs.

Field	Definition
Fail Open Event	If the Open is not received, Stages will generate this event.
Fail Close Event	If the Close is not received, Stages will generate this event.
Early Open Event	When the Open is received before the scheduled time, Stages will generate this event.
Late Open Event	When the Open is received after the scheduled time, Stages will generate this event.
Early Close Event	When the Close is received before the scheduled time, Stages will generate this event.
Late Close Event	When the Close is received after the scheduled time, Stages will generate this event.
