

Schedules at a Site Group Level

Last Modified on 10/26/2023 1:36 pm EDT

Site Groups are used to represent dealers and any other grouping of sites. Grouping sites allows Stages to quickly and efficiently apply processing rules to many sites at once, improving handling time.

Schedules can be managed at the Site Group Level, just like at the Site Level. This allows for one schedule to be used for a Group of accounts.

Site Group Schedule

To apply a schedule to a particular site:

- Click on Area & Open/Close.
- Add the Schedule to the Site via the Site Group Schedule.
