# Restoral (RST)

Last Modified on 06/14/2023 11:26 am EDT
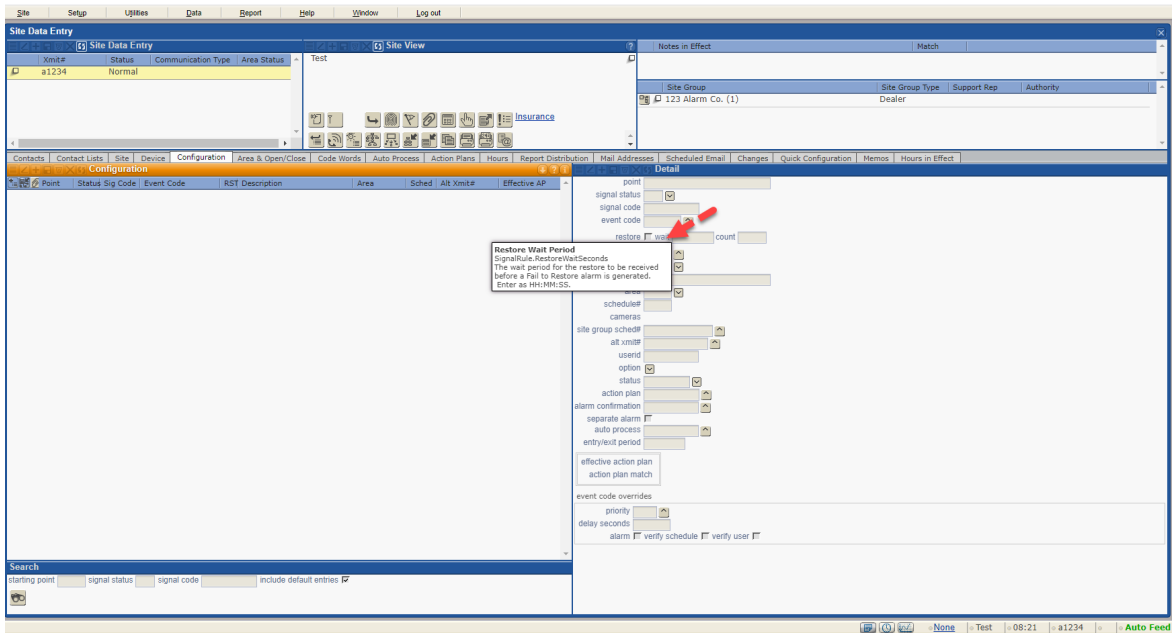

stages® Documentation - Home

Restoral (RST)

The Restore Flag indicates that the point reports restores and the Restore state is tracked. Only use if the entry contains a point and the signal status is an 'A' (alarm).

The Restore Wait minutes can be entered (default is 20 minutes) and the Count of how many times the restore expected event will be set up.
