

Site Database

The site database report will generate a detailed list of site information for the selected site, range, or group. Additional information can be added through checking the corresponding box.

Default information: Site information, Phones, Mailing address, Site Groups, Agency, Permit, UDF

The screenshot shows a window titled "Site Database" with a close button in the top right corner. The window contains several input fields and checkboxes for configuring a report. The fields include "site group", "site", "start xmit#", "end xmit#", "start first signal", "end first signal", and "report group". The checkboxes include "site notes", "contacts", "devices", "schedules", "pin & codewords", "lockbox code/location", "signature", and "exclude oos". The "file type" dropdown is set to "PDF". A printer icon is located in the bottom left corner of the window.
