

Operator Action Function Keys

Operator Actions can be assigned an Accelerator to open the operator action entry with the operator action automatically populated by pressing the Accelerator in the Alarm Dispatch window. Up to 27 Accelerators can be assigned. Available Accelerators are listed in the drop down.

The Accelerators can be defined in the Language Application. (Operator Action Function Keys)

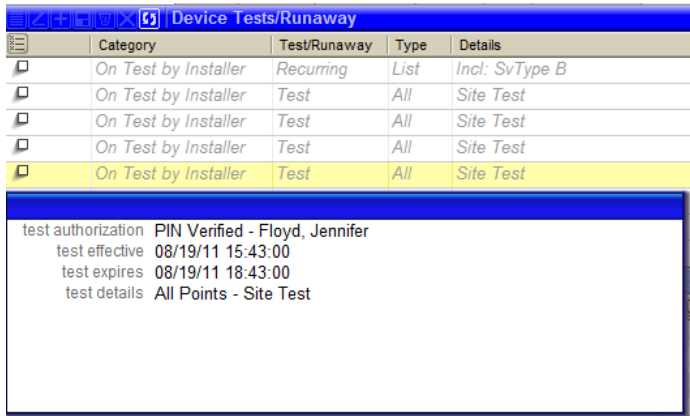

Incoming Phone

Phones matching on a Site Group or Site Group Contact return the Site Group instead of a list of Sites. The Site Group can be opened or Sites can be searched within the Site Group.

On Test

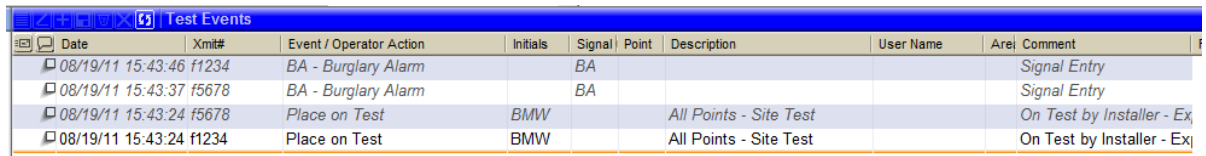

The Test Authorization field has been added to the flyout in the Device Tests/Runaway list and the Test Events list. When a Code Word is used to place an account on test, 'Code Word Given' is displayed in Test Authorization. When a PIN is used, 'PIN Verified' – [Contact Name] is displayed. If a Site Group Code Word or PIN is verified, the site group type displays in parentheses. This is also displayed in the Recent History and History windows.

Category	Test/Runaway	Type	Details
On Test by Installer	Recurring	List	Incl: SvType B
On Test by Installer	Test	All	Site Test
On Test by Installer	Test	All	Site Test
On Test by Installer	Test	All	Site Test
On Test by Installer	Test	All	Site Test

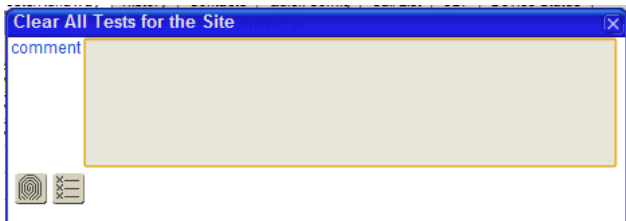

test authorization	PIN Verified - Floyd, Jennifer
test effective	08/19/11 15:43:00
test expires	08/19/11 18:43:00
test details	All Points - Site Test

Test Events displays test results from both the Primary and Secondary devices. Xmit# has been added.

Date	Xmit#	Event / Operator Action	Initials	Signal	Point	Description	User Name	Area	Comment
08/19/11 15:43:46	f1234	BA - Burglary Alarm		BA					Signal Entry
08/19/11 15:43:37	f5678	BA - Burglary Alarm		BA					Signal Entry
08/19/11 15:43:24	f5678	Place on Test	BMW			All Points - Site Test			On Test by Installer - Ex
08/19/11 15:43:24	f1234	Place on Test	BMW			All Points - Site Test			On Test by Installer - Ex

Contact verification has been added to Clear test, Clear All Test, and Extend Test.

A Comment can be entered into history tied to the test results on the Test Events window.

Date	Xmit#	Event / Operator Action	Initials	Signal	Point	Description	User Name	Area	Comment
08/22/11 11:21:53	f5678	Place on Test	BMW			All Points - Site Test			On Test by Installer - Ex
08/22/11 11:21:53	f1234	Place on Test	BMW			All Points - Site Test			On Test by Installer - Ex

On Test by SMS

An SMS Prompt “TestSite” has been added to place the entire site on test via SMS.

If the SMS test category has SMS auto notify enabled, results will be sent via SMS to the phone that put the account on test.

Code Word/PIN Verification

‘No Confirm on Exact PIN/Code Word Match’ has been added to stages™ Options | Dispatch to disable the confirm window when verifying contacts and code words.

Recent History Summary

Recent History Summary has been added to the dispatch window. For the last 24 hours, the count of Event Codes/Operator Actions by Alarm Category is listed with the time since the first occurrence and the most recent occurrence. This will give the operator a quick summary of what has occurred on the account in the last 24 hours.

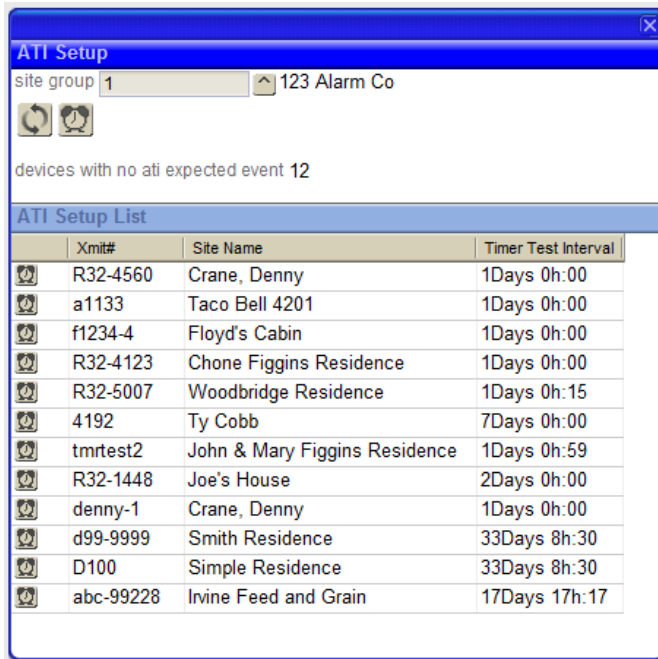

Alarm Category	Count	First	Most Recent
On Test	3	03:05:15	03:05:15
Access	1	00:00:02	00:00:02

Contract Item

The Contract Item field has been expanded to support 50 characters.

ATI Setup

The ATI Setup utility can now be filtered by Site Group. The Set Up All button will set the ATI for all devices belonging to the Site Group selected.

Xmit#	Site Name	Timer Test Interval

Reports

Skip functionality has been added to the Pending Reports list. This will move the report to the Problems list. This functionality is only available to full permission users.

The screenshot shows a web application window titled "Report Generation". The window has a blue header bar with a search icon and a "Status" label. Below the header, there is a "report type" dropdown menu and a play button icon. The main content area is split into two panes. The right pane displays the status: "total pending 17" and "oldest pending 313h:45". Below this, there are tabs for "Pending", "Sent", and "Problems", with "Pending" selected. A table below the tabs lists pending reports with columns for Report#, Posted, Description, Email To Address, Print Copy, and Email Subject.

Report#	Posted	Description	Email To Address	Print Copy	Email Subject
8196	08/09/11 12:49:37	Detailed Activity Report	secglobe@gmail.com	<input type="checkbox"/>	Daily Activity
